### **About *Projections***

*Projections: The Journal for Movies and Mind* is an interdisciplinary, peer-reviewed journal that explores the ways in which recent advancements in fields such as psychoanalysis, cognitive psychology, neuroscience, genetics and evolution help to increase our understanding of film, and how film itself facilitates investigations into the nature and function of the mind. The journal also incorporates articles on the visual arts and new technologies related to film. The aims of the journal are to explore these subjects, facilitate a dialogue between people in the sciences and the humanities, and bring the study of film to the forefront of contemporary intellectual debate.
